From Simulation to Reality

Be
READY
with NextGen VR

Introducing the Be READY VR Portfolio

Three Industry-Leading Solutions

Empower healthcare professionals with immersive, high-fidelity virtual reality (VR) training. The Be READY VR Portfolio provides an advanced learning experience for medical professionals, offering realistic, hands-on training in a controlled, risk-free environment. These solutions enhance clinical decision-making, patient interaction, and emergency response skills with cutting-edge technology.

Be READY XR Clinic

Virtual Reality Medical Training Solution for Outpatient & General Practice

Train medical students and professionals in outpatient care, diagnostics, and patient interaction with high-resolution VR simulations.

Advanced VR medical simulation to fit any budget.

Key Features	
	<ul style="list-style-type: none">• Low price• Special pricing for classrooms
	<ul style="list-style-type: none">• Industry leading graphics• Minimum space for product use is 4 sq. ft.
	<ul style="list-style-type: none">• Lifetime license for VR simulator set• Desktop version license valid for 4 years
	<ul style="list-style-type: none">• Unique teleportation feature inside VR section• Fastest setup, load and response time
	<ul style="list-style-type: none">• 200+ medical scenarios in library• Case Manager for creating and editing your own cases• Smart Center with Spectator feature for managing and tracking training
	<ul style="list-style-type: none">• Multi-user capability – ideal for medical schools or simulation centers• Multiple languages: English, Spanish, Arabic, Turkish, Portuguese, German, Chinese, French, & more

Be READY for Comprehensive Virtual Nursing

Be READY VR Nursing is a virtual simulator designed to train nurses in professional skills by immersing them in clinical practice scenarios with a wide variety of virtual patients.

Safely perform assessments, examinations, and administer treatments in a realistic environment.

Features clinical case libraries with comprehensive overviews of emergency care, ICU management, medical care, and pediatric care.

Customize medications and scenarios while evaluating performance against standard assessment systems and protocols.

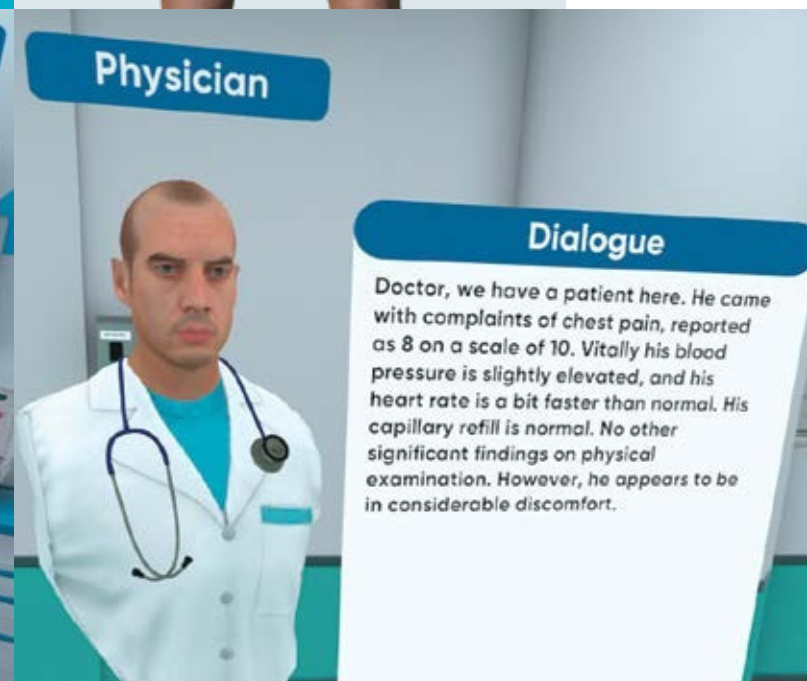

Customize medications, scenarios and environments to suit individual needs.

The highest level of graphics and immersion in a virtual medical environment.

KEY FEATURES:

- Lifetime license
- Automatic updates
- Haptic feedback
- Patient and team interaction with dialogue
- Multiplayer (Crew Resource Management)
- Over 100 interactive items
- Mechanical ventilation
- CPR, airway management
- Defibrillation, ECG
- Customizable medications and scenarios
- Performance evaluation
- Multiple languages: English, Spanish, Portuguese, Chinese, Korean, German, French and Arabic

Be READY for Emergency Care & Patient Transport

Be READY VR 911 is a cutting-edge VR simulator designed for EMS professionals to practice emergency medical care and transport in a realistic, hands-on environment. It enhances training by simulating real-world EMS scenarios with interactive patient care and real life critical medical equipment and scenarios..

KEY FEATURES:

- Lifetime license
- Automatic updates
- Haptic feedback
- Patient and team interaction with dialogue
- Multiplayer (Crew Resource Management)
- Customizable medications and scenarios
- Performance evaluation

Be READY VR 911 provides a fully immersive, hands-on training experience for emergency medical professionals. It offers a dynamic environment where users can develop critical patient care skills, including:

- **Realistic emergency scenarios** – Train in a fully immersive ambulance setting with lifelike treatment options, equipment and patient interactions.
- **Comprehensive patient care** – Practice assessment, monitoring of vital signs, prehospital drug calculation and critical decision-making.
- **Hands-on medical procedures** – Perform palpation, auscultation, lab test interpretation, injections, IV therapy and airway management.
- **Advanced equipment training** – Operate transport ventilators, infusion pump devices and cardiac monitors.
- **Team-based training** – Work with colleagues in multiplayer mode for coordinated emergency response.
- **High-quality graphics & realism** – Experience detailed patient anatomy and dynamic visual effects for an immersive learning experience.

Be READY VR 911 prepares EMS providers to handle real emergencies with confidence, bridging the gap between training and real-life practice.
