

DANi® Adult Patient Care Platform Comparison Guide

DANi® patient care trainers and the NextGen DANi platform support competency-based nursing education, from foundational patient care and clinical skills through advanced patient assessment and immersive learning.

Developed alongside nurse educators, DANi helps learners build clinical competency through realistic patient assessment, hands-on patient care, and clinical decision making while supporting educators with intuitive, practical technology.

Product	Description
DANi Patient Care Trainer	Foundational patient care trainer designed for teaching activities of daily living, patient mobility, and essential bedside care skills.
DANi Patient Skills Trainer	Builds on the Patient Care Trainer by adding blood pressure assessment, injections, IV therapy, airway management, catheterization, and respiratory care.
DANi Auscultation Trainer	Adds heart and lung auscultation to support patient assessment and clinical reasoning.
DANi Auscultation Trainer with Monitoring	Integrates patient monitoring to strengthen patient assessment and clinical decision making.
NextGen DANi Pro	Purpose-built patient care platform integrating patient assessment, nursing skills, diagnostics, and patient monitoring to support competency-based nursing education.
NextGen DANi Immersive	Extends NextGen DANi Pro with an immersive learning environment that supports competency-based nursing education through realistic clinical experiences.

Available in light and medium skin tone
