| Dimensions/ Weight | Dimensions: 36 cm L x 22 cm W x 13.5 cm H Ship weight: 2.3 kg (5.07 lbs) |
| Product Codes/SKUs | <p>MVRG-010 – VR Goggles Oculus (META) Quest 3, requires active license, not for standalone sale</p> <p>XRCL-M010 – Be READY VR XR-Clinic Patient Simulator Software, lifetime, per device, goggles not included</p> <p>XRC-M010 – Be READY VR XR-Clinic Patient Simulator, lifetime, per device, goggles included</p> <p>XRC-DGL001 – Be READY VR XR-Clinic Desktop Software, 2 years, unlimited users, hardware not included</p> <p>XRCL-TBL – Be READY VR XR-Clinic Interactive Table Software, 2 years, per device, table not included</p> <p>XRCL-TGL – Be READY VR XR-Clinic Interactive Table Software, lifetime, per device, table not included</p> <p>XRC-DUL001 – Be READY VR XR-Clinic Desktop Software, 2 years, per person, sold in packages of 20, hardware not included</p> <p>XRCL-EDM2534 – Be READY VR XR-Clinic Patient Simulator Software, 2 years, per device, additional volume discount for 25+ pieces, goggles not included</p> <p>XRC-CM001 – Case Manager Web Service, 150 case scenarios, 1 year</p> <p>XRC-CM002 – Case Manager Web Service, 300 case scenarios, 2 years</p> <p>XRC-AI – AI Upgrade for XR-Clinic, 2 years, 40 sessions per month, per device</p> <p>XRC-AIPLUS – AI Upgrade for XR-Clinic, 3 years, 80 sessions per month, per device</p> <p>XRC-AIPRO – AI Upgrade for XR-Clinic, 5 years, 100 sessions per month, per device</p> |
| Hardware Specifications | <p>Compatible with Meta Quest 2, Meta Quest 3S, and PICO 4 Ultra VR headsets.</p> <p>Interactive Table:</p> <ul style="list-style-type: none"> · Touchscreen Device: Windows-based interactive panel or tabletop system · Processor: Intel Core i5 2.3 GHz or higher · RAM: ≥ 8 GB · Graphics Card: NVIDIA GeForce GTX 1650 or equivalent · Disk Space: ≥ 6 GB free · Resolution: Minimum 1280 × 1024 · OS: Windows 10 / 11 |

Be READY VR XR-Clinic
Clinical reasoning and diagnostic decision-making

AI Upgrade Available

Part of the Be READY VR Portfolio
Immersive VR • Desktop Software • Tablet App • Interactive Table

Introducing XR-Clinic within the Be READY VR Platform

Be READY VR XR-Clinic helps learners evaluate patients, develop differential diagnoses, and plan treatment through realistic outpatient encounters.

Flexible Simulation Formats

- Immersive VR for fully interactive clinical environments
- Desktop Software for individual or classroom-based training
- Interactive Table for collaborative, group-based simulation

Platform Capabilities

- Multiplayer capability for team-based training
- Instructor monitoring and analytics through Smart Center
- Scenario customization through Case Manager
- Multilingual platform support

AI-Enhanced Simulation (Optional Upgrade)

Real Conversations. Guided Learning. Measurable Outcomes.

- AI-powered patient interaction for clinical reasoning and communication
- AI-driven performance assessment across key competencies
- Supports scalable learning without increasing instructor burden
- Enhances realism through dynamic, unscripted patient responses

Key Features

- Cost-effective at scale for classroom and program deployment
- Volume-based pricing designed for institutions and cohort training
- Automatic updates during active subscription
- Industry leading graphics
- Minimum space for product use is 4 sq. ft.
- Lifetime license for VR simulator set
- Desktop and interactive table licenses also available
- Unique teleportation feature
- Fast setup, load and response time
- 230+ outpatient clinical cases
- Case manager for creating and editing cases
- Smart Center with Spectator features for managing and tracking performance
- Multiplayer (Crew Resource Management)
- Ideal for medical schools and sim centers
- Multiple languages: English, Turkish, Spanish, Arabic, German, Portuguese, French, Chinese, Thai, Filipino, Indonesian, and Chinese in Taiwan (Traditional)

Train Clinical Decision-Making Through Interactive Simulation

Scenario Library

230+ outpatient clinical cases

Scenarios simulate common clinical encounters and guide learners through the diagnostic process.

Clinical Specialty Coverage:

- Cardiology
- Pulmonology
- Gastroenterology
- Nephrology & Urology
- Endocrinology
- Infectious Diseases
- Hematology
- Surgery
- Rheumatology
- Oncology
- Pediatrics

Learners

Learners practice the clinical reasoning process during outpatient simulation scenarios.

- Evaluate patient symptoms
- Gather medical history and diagnostic data
- Perform virtual examinations
- Interpret laboratory results
- Determine appropriate treatment plans

Train more learners.
Reduce instructor burden.
Deliver measurable clinical competency.

Instructor Tools

Smart Center: Monitor sessions, track learner performance, and support facilitated debriefing across training programs.

Case Manager: Edit existing cases or create custom scenarios aligned with institutional protocols.

Includes 12 months of access to create up to 30 new cases and customize existing scenarios.

AI That Makes Simulation Smarter

From static scenarios to dynamic learning that adapts to every decision.

The Be READY VR portfolio uses AI to transform how learners interact, practice, and improve. Instead of fixed scenarios, learners engage in real-time conversations, receive guided support, and are evaluated objectively across clinical and communication skills.

The Gap in Traditional Simulation

Scripted & Predictable

Instructor Dependant

Hard to Scale

Limited Insights

The AI Advantage

Dynamic & Responsive

Scalable & Supportive

Objective & Measure

Clinical Readiness

AI doesn't replace instructors. It empowers them.

How AI Enhances Learning

**Real Conversations
AI Patients**

**Guided Learning
AI Tutor**

**Objective Assessment
AI Assessment**

Flexible Upgrade Options Across the Be READY VR Portfolio

| | AI Upgrade | AI Upgrade Plus | AI Upgrade Pro |
|--|-------------------------|----------------------|----------------------------|
| Duration | 2 Years | 3 Years | 5 Years |
| Sessions per Month (per Device) | 40 | 80 | 100 |
| Ideal For Programs | Getting started with AI | Scaling your program | Maximizing usage and value |

Flexible Simulation Formats Across the Be READY VR Platform

Deploy XR-Clinic across immersive and screen-based environments to fit your program needs.

Immersive VR

Headset-based simulation that places learners inside interactive clinical environments.

Interactive Table Software

Collaborative simulation on large touchscreen displays for group training.

Desktop Software

Scenario-based training on standard Windows computers for individual or classroom use.

Part of the Be READY VR Portfolio
Also available: Nursing and 911/EMS simulation modules built on the same platform
