

SPARK - Be READY to bring real conversation to your simulations

Addresses Training Needs/ Curriculum	Spark is a virtual simulated patient platform that delivers simulated clinical experiences to healthcare students. Simulate real-life patient interactions with AI-driven conversations and automated assessments.
Product Codes/SKUs	<b>101-7315</b> - Spark <b>101-7316</b> - Spark Pro
Configuration	<b>Spark</b> <ul style="list-style-type: none"><li>• Over 50 Scenarios</li><li>• Customizable Assessment with Resource Sets</li><li>• Screen Based and VR Experiences</li></ul> <b>Spark Pro</b> <ul style="list-style-type: none"><li>• All features included with Spark, plus<ul style="list-style-type: none"><li>◦ Scenario creation</li><li>◦ Two-way integration with Canvas, Moodle, Blackboard, and other LTI 1.3 compliant LMS platforms</li></ul></li></ul>
Key Skills	<ul style="list-style-type: none"><li>• Practice gathering comprehensive health information</li><li>• Improve diagnostic accuracy</li><li>• Personalize patient care</li><li>• Enhance communication skills</li><li>• Ideal for Medical and Nursing</li></ul>

READY

SPARK: Virtual Simulated Patient Platform

# Real Conversations. Real Skills. Real READY.

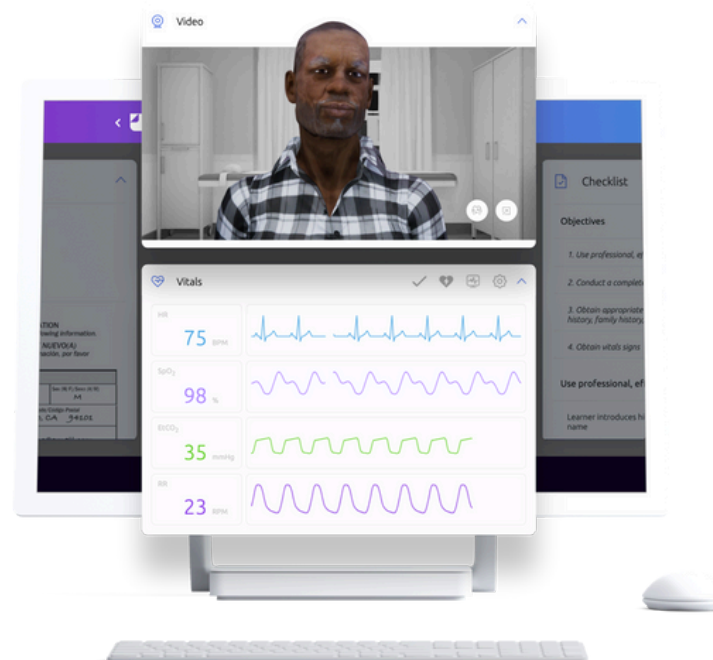

SPARK is a virtual simulated patient platform that brings real clinical conversations to life. Powered by AI, it enables students to practice realistic patient encounters—from gathering histories to executing treatment plans—all in a safe, repeatable, and measurable environment.

## Nursing Students:

- Conduct health histories to assess the physical, mental, and emotional health of patients
- Perform vital signs monitoring and assessment with interactive tools
- Document findings with the built-in SBAR Hand-off
- Review provider orders, labs, imaging and more
- Perform interventions and administer medication to implement patient treatment plans
- Practice learner-to-provider communication using SBAR
- Learn core nursing procedural skills including Physical Exam
- Assessment, IV Cannulation, and Tracheostomy Care

## Medical Students:

- Evaluate a patient's physical condition from head to toe with an interactive physical exam
- Document findings with the built-in SOAP note
- Order labs, imaging and more to come to a diagnosis
- Administer medication and develop a treatment plan
- Practice procedural skills including ultrasound guided central line, and provide counseling to the patient pre-op and post-op

## Why Students Love SPARK:

- Auto-Assessments instantly available post-simulation
- Practice frequency and flexibility
- Individualized feed can be practiced in the privacy of their own safe learning space
- Individualized feedback from faculty with Credit Challenge functionality
- PGY-1 preparedness with provider-to-provider communication & post patient encounter documentation
