Victim handling and rescue training for the realities of the field.

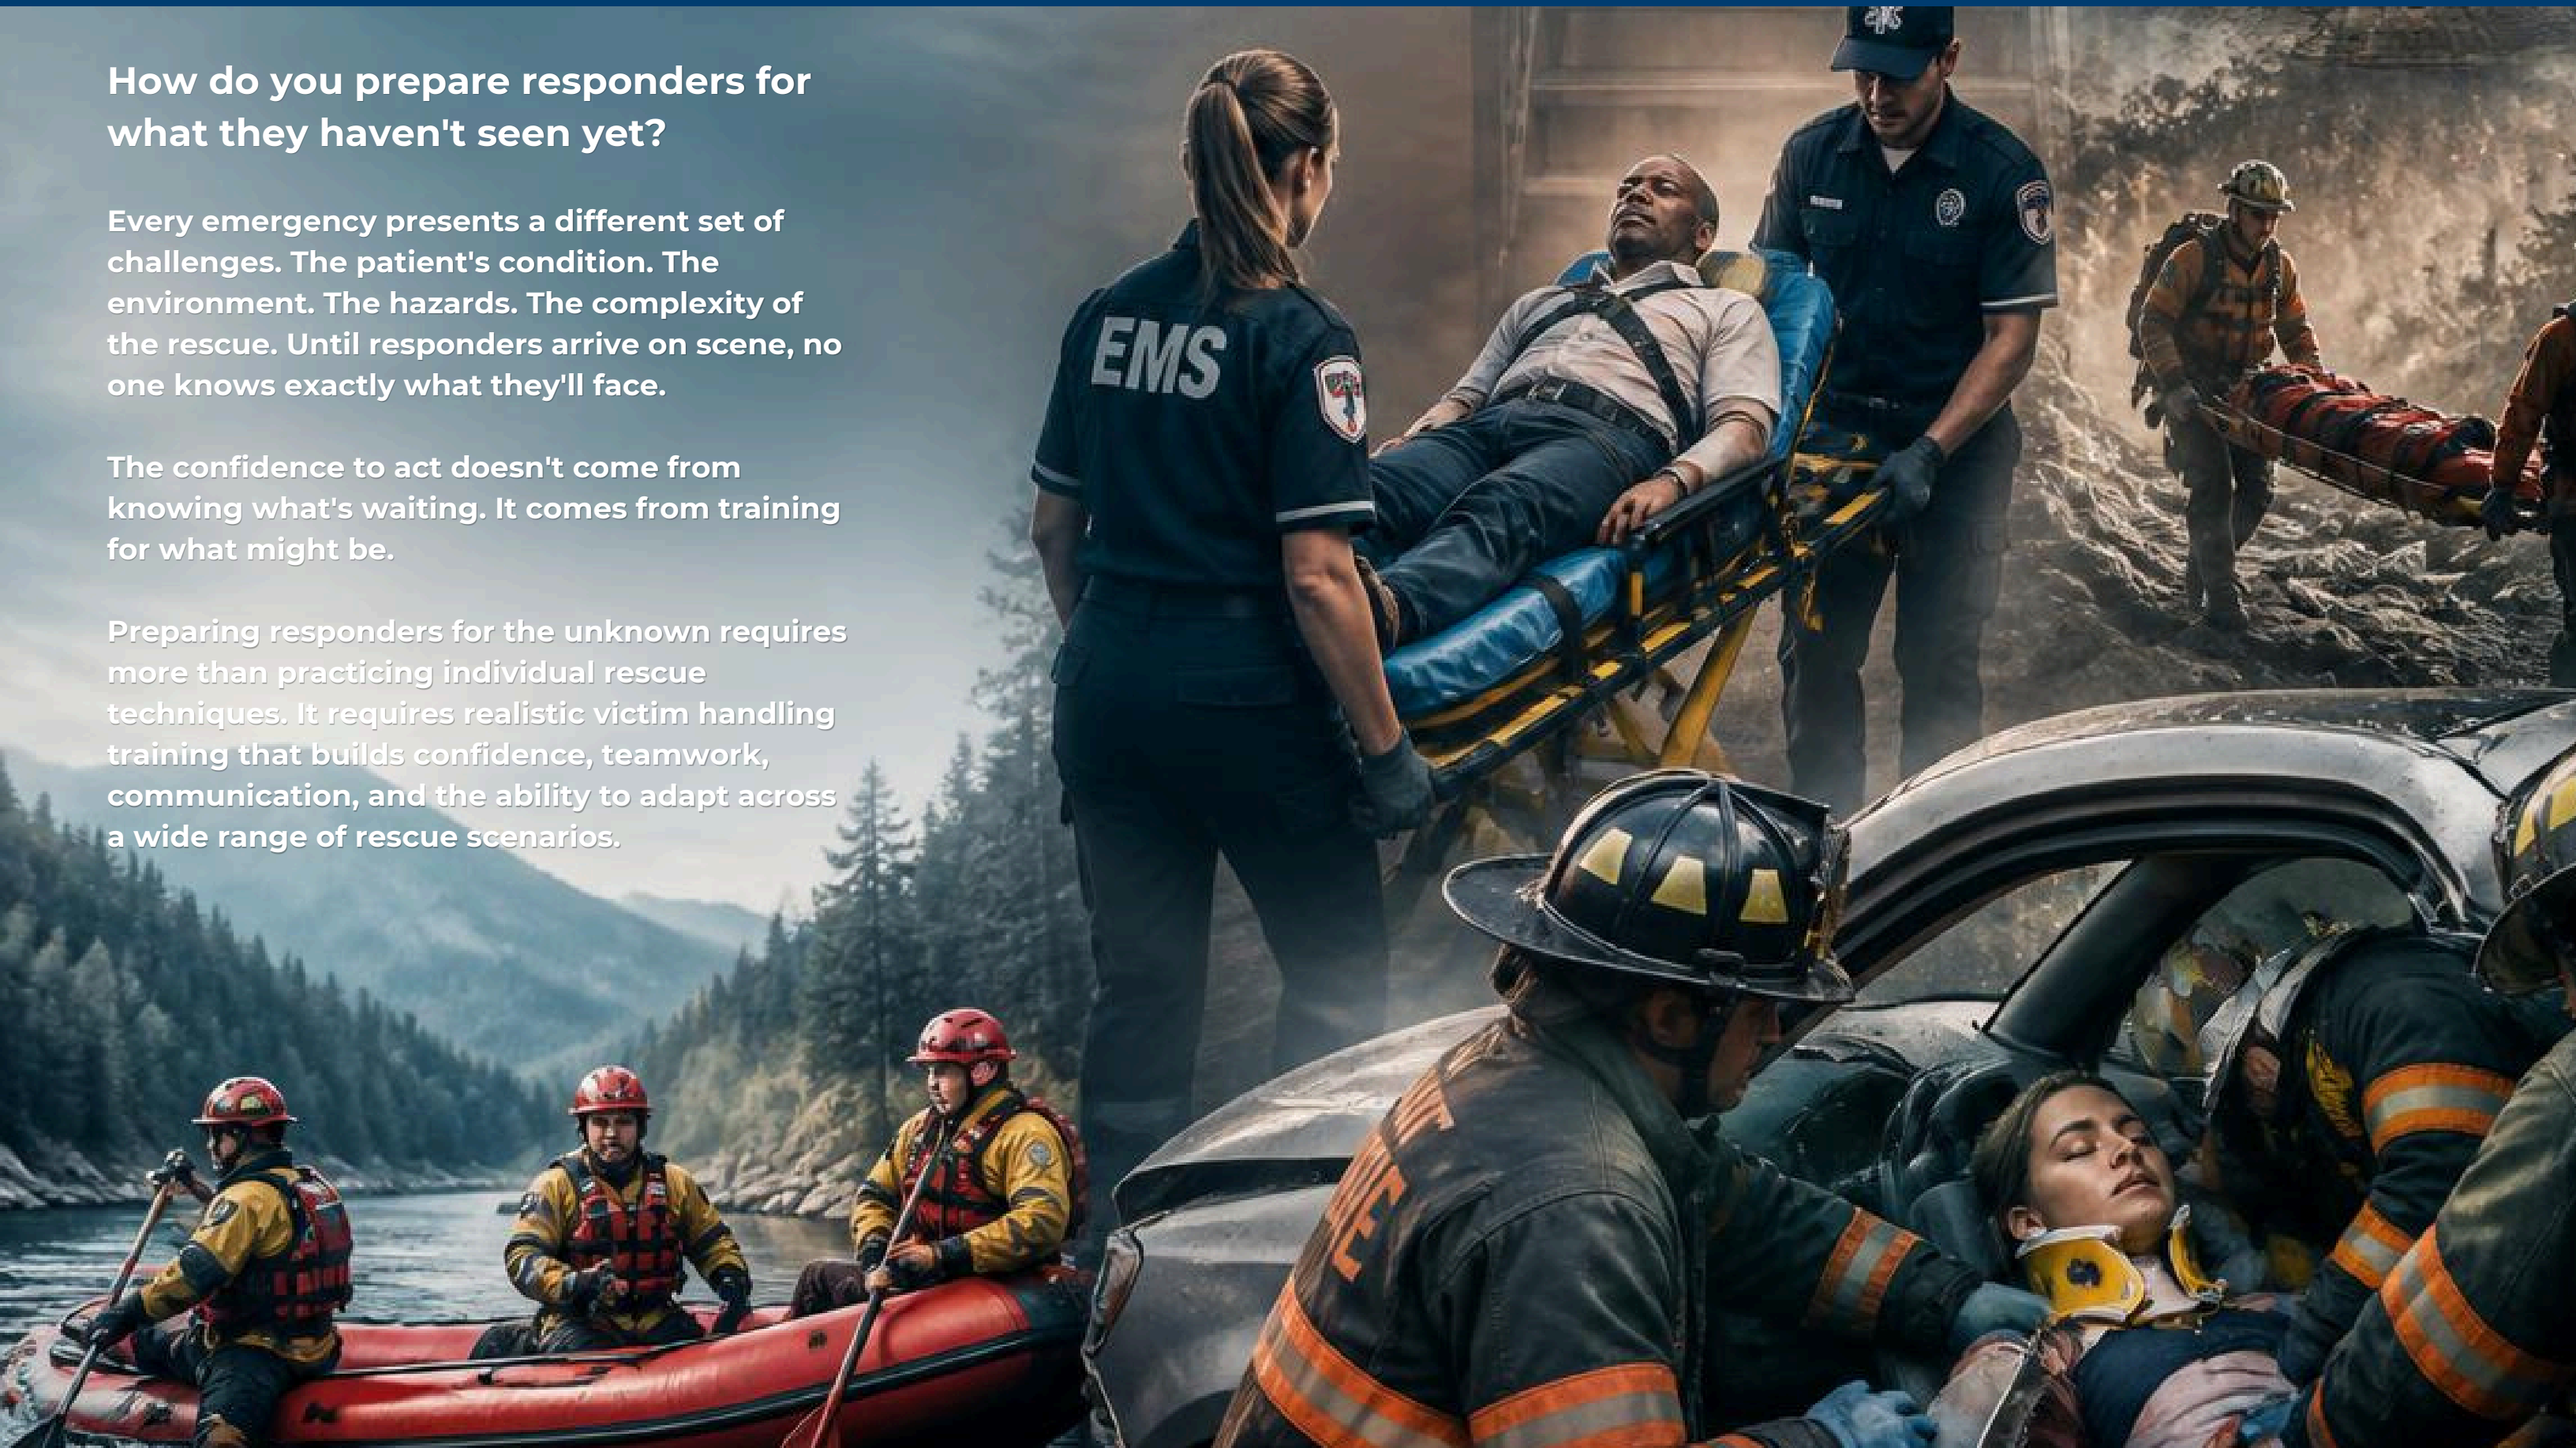

# No Two Calls Are the Same.

How do you prepare responders for what they haven't seen yet?

Every emergency presents a different set of challenges. The patient's condition. The environment. The hazards. The complexity of the rescue. Until responders arrive on scene, no one knows exactly what they'll face.

The confidence to act doesn't come from knowing what's waiting. It comes from training for what might be.

Preparing responders for the unknown requires more than practicing individual rescue techniques. It requires realistic victim handling training that builds confidence, teamwork, communication, and the ability to adapt across a wide range of rescue scenarios.

# Preparing Responders for the Realities of Rescue.

Rescue operations demand more than individual skills. They require responders to safely lift, drag, carry, package, and extricate victims in unpredictable environments. Rescue Randy provides realistic weight distribution across a wide range of body styles and configurations, helping educators prepare responders for the realities of victim handling, transport, and extrication.

## Rescue Randy

- Realistic victim handling, transport, and extrication
- Fully articulated for lifelike positioning
- Available in multiple weight and skin tone options
- Built for years of demanding rescue training

## Large Body Rescue Randy

- Larger body profile for realistic rescue training
- Multiple weight configurations from 55–250 lb
- Available in light and dark skin tones
- Ideal for lifting, carrying, transport, and extrication exercises

## IAFF Large Body Rescue Randy

- Developed with the IAFF
- Reinforced for repeated firefighter training
- Realistic weight distribution
- Supports drag, carry, ladder carry-down and confined space training

# One Mission. Many Unique Challenges.

**Confined Space Rescue**

**High-Intensity Rescue**

**Firefighter Challenge League**

## **Flexible Randy**

- Flexible head and waist
- Simulates victims in aircraft, vehicles, and confined spaces
- Supports realistic rescue and victim extrication training
- Ideal for scenarios where standard manikins cannot be positioned

## **Rugged Rescue Randy**

- Reinforced construction for demanding rescue environments
- Tear-resistant joints for increased durability
- Enhanced flexibility for challenging rescue scenarios
- Ideal for vehicles, aircraft, and restricted spaces

## **Firefighter Challenge League Randy**

- Official Firefighter Challenge training manikin
- Designed for realistic victim drag events
- Reinforced for repeated, high-intensity use
- Helps prepare athletes for competition and firefighter fitness
